

Click to Dial – Chrome Plug-In

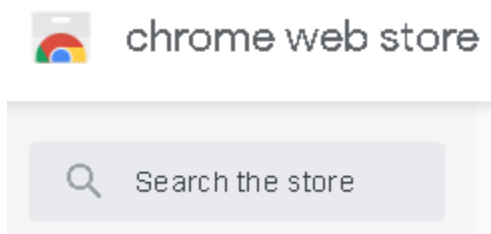

1. Open your Chrome browser
2. A. You can directly go to this link:
<https://chrome.google.com/webstore/search/Mobile%20Voip%20Connect> and look at the **Mobile VoIP Connect** extension.

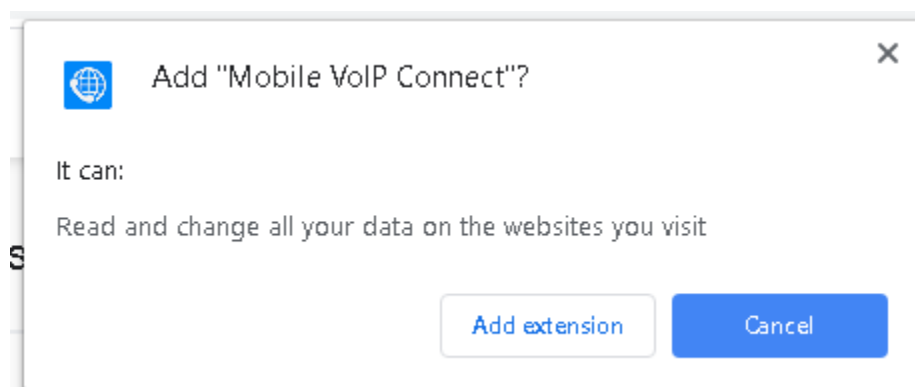

The screenshot shows the Chrome Web Store listing for the 'Mobile VoIP Connect' extension. On the left is a blue icon with the text 'MobileVoip Connect'. To the right, the title 'Mobile VoIP Connect' is displayed above 'Offered by: Mobile VoIP Connect'. Below that, it says 'Allows the user to initiate a call by clicking on any phone number displaye' and shows a rating of '★★★★★ 2 Social & Communication'. A blue 'Add to Chrome' button is on the right.

B. Or you can do it by going to this link:

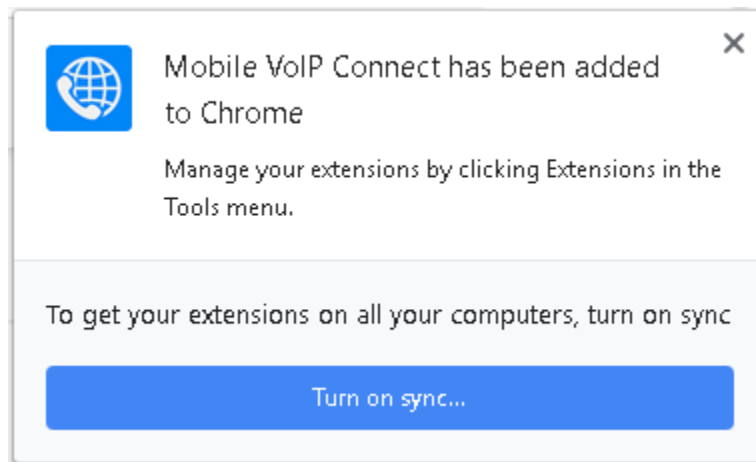

<https://chrome.google.com/webstore/category/extensions> , type on the search bar **Mobile VoIP Connect** .

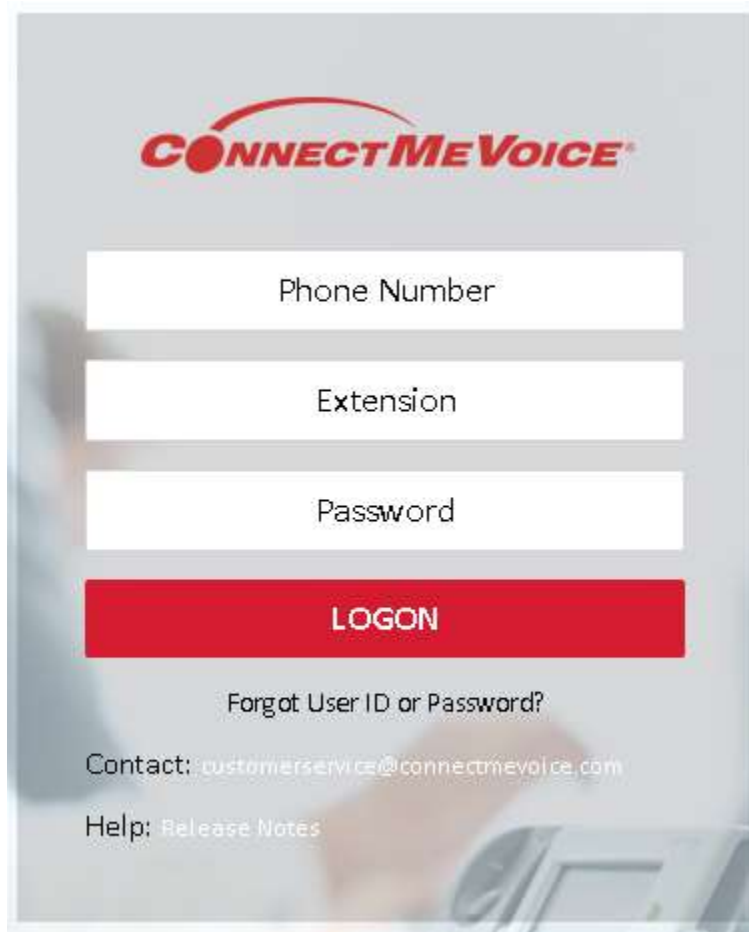

3. Click **Add to Chrome** button to install the Mobile VoIP Connect extension.

4. You will see the dialog box below, showing you that the **Mobile VoIP Connect** has been added to your Chrome.

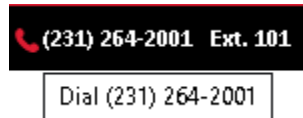

5. After installing the **Mobile VoIP Connect** extension to your Chrome browser, log in to connectmevoice.com portal using your **Phone Number**, **Extension**, **Password/Pin**.

6. Once the **Mobile VoIP Connect** plugin has been added to your Chrome browser, **any websites that display phone numbers, will show a phone icon**. If you are already logged to the connectmevoice client portal, you will see a phone icon beside phone numbers being displayed.

7. Hover over the phone icon to dial the phone number, you will get a message on the screen telling you the number is being dialed.

8. If you are not logged in, you will be prompted to log in.
9. Any of your phones that are registered will ring, answer it and you will be on the call.
